

ProQuest Digital Sanborn Maps, 1867–1970: Accessibility Conformance Report

VPAT® Version 2.4: February 2020

Name of Product/Version: ProQuest Digital Sanborn Maps, 1867–1970

Product description: Digital Sanborn Maps provides digital access to 660,000 large-scale maps of American towns and cities, searchable by city and year. Sanborn Fire Insurance Maps are the most frequently consulted maps in public and academic libraries. Founded in 1867 by D. A. Sanborn, the Sanborn Map Company was the primary American publisher of fire insurance maps for nearly 100 years. The maps were originally compiled to help insurers assess the value of property, identify risk factors, and underwrite losses. These maps contain detailed data such as building outlines, size, use, construction details, and function of structures. They also give street names, street and sidewalk widths, property boundaries, house and block numbers, and other features like pipelines, railroads, wells and dumps.
