# ProQuest **TDM Studio**

A Text and Data Mining Solution for **Research, Teaching and Learning**

The Most Efficient Path for Text and Data Mining

Analyze sought-after content, uncover connections, and make career-defining discoveries

Text and Data Mining Creates Challenges for Researchers...

- Cumbersome, manual processes
- Uncertain content usage rights
- Dirty, incomplete data
- Irrelevant data
- Inaccessible content
- Disparate data formats
- Painful software installation
- Wasted computing capacity
- Gaps in coverage
- Long wait times
- Siloed research teams
- Painful data processing
- Gaps in communication and collaboration

Long Awaited Results

TDM Studio Streamlines the Text and Data Mining Process

- Content rights cleared for TDM
- Marquee content: current and historical news, dissertations, scholarly journals, and more
- Consistent data structure
- Content targeted to a specific research topic
- Complete metadata
- Create datasets in hours instead of months
- Real-time collaboration
- Ready-to-use, cloud-based software

Actionable insights in significantly reduced time
