

ProQuest Health & Medical Resources

At ProQuest, we're focused on enabling the best outcomes for the time users invest in their research. We know that every improvement we make in their workflow frees users to spend more time on their core mission. That often means conquering barriers between them and the rich diversity of content they require.

Researchers tell us that missing relevant research literature is their number one worry, so we dig deep to understand their requirements. We know that...

- **They need books – print and e:** Researchers often need to explore deeper than a journal article allows. Books add extra layers of context and detail to give a more comprehensive understanding of a topic.
- **They want working papers and conference proceedings:** The peer review process can take up to two or three years. Researchers use working papers and conference proceedings to see the latest thinking first, with the same articles often turning up years later in peer-reviewed journals.
- **Evidence-based content provides an on-site second opinion:** Researchers are increasingly relying on evidence-based data for practical guidance within their workflow.
- **Training videos provide practical how-to's:** In health sciences, demonstration helps students study independently bringing them to the lab ready to learn.

Scholarly journals remain a priority and ProQuest's longstanding partnerships with premier publishers ensures access to the best quality, but we don't stop there. ProQuest's databases buoy scholarly journal articles with the mix of content faculty and students demand – training videos, monographs, working papers, conference proceedings, reports, data.

Expertly indexed and organized, ProQuest's databases empower researchers to go further, faster.

Health Research Premium Collection

Central access to the broadest collection of essential medical resources

IN THE MEDICAL field, access to the latest healthcare information is always essential, whether it's for students, researchers, medical professionals, hospital administrators, or even for patients and their families. The Health Research Premium Collection addresses these diverse needs by offering a central access point to a variety of essential medical resources.

The Health Research Premium Collection is uniquely suited for libraries whose users require content for learning and researching health, medicine, and related subject areas. Our content helps health science librarians meet the research needs of their many audiences, whether it's supporting a clinical research study, or providing faculty with instructional multimedia content to help students connect theory to practice.

While other providers tend to focus solely on the information needs of established professionals, ProQuest's unique mix of training content, scholarly literature, and clinical reference materials is accessible to those preparing for a career in healthcare. The variety of source types makes it easier for students and researchers alike to understand new subjects, access relevant literature, and monitor the latest thinking.

The Health Research Premium Collection serves a wide range of users with the broadest collection of healthcare journals, evidence-based resources, and full-text dissertations. This resource provides subscribing institutions with the widest breadth of aggregated health and medical content, and includes the following databases:

- **Health & Medical Collection** — in-depth coverage from leading biomedical publications
- **Nursing & Allied Health Database** — reliable healthcare information covering nursing, allied health, alternative and complementary medicine, and much more
- **Health Management Database** — relevant resources for anyone interested in the business of running a health organization
- **Psychology Database** — key information from leading psychology and psychosomatic publications
- **Public Health Database** — a global resource for students, faculty, researchers, clinicians, policy makers, and all others involved in the study of population and public health
- **Family Health Database** — journals and magazines covering an enormous range of health subjects, from sports injuries to women's health, from food and nutrition to midwifery, from eye care to dentistry
- **MEDLINE®** — a bibliographic database produced by the U.S. National Library of Medicine (NLM). The database contains millions of citations derived from thousands of biomedical and life science journals, and is indexed with Medical Subject Headings (MeSH®) from the NLM controlled vocabulary.

Subject areas include:

- Anatomy
- Biochemistry
- Cardiovascular diseases
- Communicable diseases
- Dermatology
- Digestive diseases
- Endocrine diseases
- Geriatrics
- Gynecology
- Hemic diseases
- Immunology
- Lymphatic diseases
- Microbiology
- Musculoskeletal diseases
- Nervous system
- Obstetrics
- Ophthalmology
- Otolaryngology
- Parasitology
- Pathology
- Pediatrics
- Pharmacology
- Physiology
- Psychiatry
- Respiratory diseases
- Surgery
- Urogenital diseases

About the Health Research Premium Collection:

Ongoing full-text access to premier journals. The collection offers ongoing full-text access to leading scholarly publications including *The New England Journal of Medicine*, *The Lancet*, and *The BMJ* (coming in April 2016) and is easily linked to other required content. Compared to other providers, the Health Research Premium Collection has shorter embargoes and more full-text content.

Comprehensive medical literature reviews. The collection supports end user need for diverse content with more than 32,000 full-text dissertations unique to ProQuest covering many areas including nursing, psychology, and health management.

ProQuest amasses summary journals, conference proceedings, industry and healthcare reports, trade journals, books, and more into a single cross-searchable collection. These primary, secondary, and tertiary content sources cover the spectrum of medicine and give all users from undergraduates and faculty to clinicians and practitioners easy access to relevant content.

Best practice. Access to evidence-based resources is as important as ever, which is why ProQuest includes thousands of evidence based articles (systematic reviews and meta-analysis) and more than 74,000 clinical trial records as well as expert opinions and findings from cohort and experimental studies.

Practical learning content. Preparation is the key to success in the clinical setting. Students can prepare for their clinical rounds through our collection of MedCom video clips to see important skills and concepts in action. Likewise, instructors can assign clips to students to reinforce textbook learnings or as a follow up to clinical experiences.

Discoverability. ProQuest collaborates with other information service providers to ensure that no matter where a researcher starts, connecting with ProQuest content is simple and seamless. In addition to The Summon® Service from ProQuest, ProQuest content is discoverable through OCLC WorldCat, Ex Libris Primo Central, PubMed, and Google Scholar. Additionally, through the ebooks tab on the ProQuest search results page, researchers can cross search their organization's ProQuest ebook holdings (if available) alongside their ProQuest platform database content.

Ease of use. Available on ProQuest, named as Best Interface in the 2015 *Charleston Advisor* Reader's Choice Awards: *"It is much more intuitive and easy to use than previous versions. It includes improved document viewing, easier navigation...Kudos to ProQuest."*

Health & Medical Collection

Key titles and diverse sources across all medical disciplines

THE HEALTH & MEDICAL Collection is uniquely suited for libraries with users who require content for learning and researching biomedical science and related subject areas. Our content helps health science librarians meet the research needs of many audiences, whether they're supporting a clinical research study or providing faculty with instructional multimedia content to help students connect theory to practice.

This collection aggregates content in all forms of media to support the learning, teaching, and research needs of institutions. This includes medical reference ebooks, instructional videos, dissertations, and working papers, and thousands of evidence-based articles and clinical trial records. The diverse source types makes it easier for students and researchers alike to understand new subjects, access relevant literature, and monitor the latest thinking.

While other providers tend to focus solely on the information needs of established professionals, this collection's unique mix of training content, scholarly literature, and clinical reference materials makes it accessible for undergraduates, medical students, and all others preparing for a career in healthcare.

About the Health & Medical Collection:

Ongoing full-text access to premier journals. The collection offers ongoing full-text access to leading scholarly publications including *The New England Journal of Medicine*, *The Lancet*, and *The BMJ* (coming in April 2016) and is easily linked to other required content. Compared to other providers, ProQuest has shorter embargoes and more full-text content.

Comprehensive medical literature reviews. The collection supports end user need for diverse content with thousands of full-text dissertations unique to ProQuest covering many areas including nursing, psychology, and health management. ProQuest amasses summary journals, conference proceedings, industry and healthcare reports, trade journals, books, and more into a single cross-searchable collection.

Best practice. Access to evidence-based resources is as important as ever, which is why ProQuest includes thousands of evidence-based articles (systematic reviews and meta-analysis) and clinical trial records as well as expert opinions and findings from cohort and experimental studies.

Learn with experts. Students can learn from the expertise of physicians, researchers, and other faculty members through the Harvard Health Publications video series. Likewise, instructors can assign clips to students to reinforce textbook learnings or as a follow up to clinical experiences.

Discoverability. ProQuest collaborates with other information service providers to ensure that no matter where a researcher starts, connecting with ProQuest content is simple and seamless. In addition to The Summon® Service from ProQuest, ProQuest content is discoverable through OCLC WorldCat, Ex Libris Primo Central, PubMed, and Google Scholar. Additionally, through the ebooks tab on the ProQuest search results page, researchers can cross-search their organization's ProQuest ebook holdings (if available) alongside their ProQuest platform database content.

Ease of use. Available on ProQuest, named as Best Interface in the 2015 *Charleston Advisor* Reader's Choice Awards: "It is much more intuitive and easy to use than previous versions. It includes improved document viewing, easier navigation...Kudos to ProQuest."

Nursing & Allied Health Database

Scholarly literature, clinical training videos, reference materials, and evidence-based resources

THE NURSING & ALLIED Health Database is a comprehensive resource for students, instructors, researchers, and healthcare professionals.

Whether it's supporting a clinical research study or providing faculty with instructional multimedia content to help students connect theory to practice, librarians rely on the Nursing & Allied Health Database for its diverse mix of scholarly literature, clinical training videos, reference materials, and evidence-based resources, including dissertations and systematic reviews. Specifically, while other providers tend to focus solely on the information needs of professionals, the Nursing & Allied Health Database is best used for those preparing for a career in healthcare, teaching patient care, or engaged in nursing research.

By going beyond journals and taking a holistic and interdisciplinary approach to subject coverage, this database is uniquely suited for students, instructors, researchers, and healthcare professionals.

Subject areas include:

- Endocrinology
- Gerontology and geriatrics
- Health facilities and administration
- Medical sciences
- Mental health
- Nurses and nursing
- Nutrition and dietetics
- Oncology
- Pediatrics
- Pharmacy and pharmacology
- Physical medicine and rehabilitation
- Psychology and psychiatry
- Public health
- Radiology and nuclear medicine
- Social services and welfare

About the Nursing & Allied Health Database:

While other providers tend to focus solely on the information needs of established professionals, ProQuest's unique mix of training content, scholarly literature, and clinical reference materials is accessible to those preparing for a career in healthcare. The variety of source types makes it easier for students and researchers alike to understand new subjects, access relevant literature, and monitor the latest thinking.

Ongoing full-text access to high impact nursing journals and elite medical publications. Ongoing full-text access to high impact nursing publications including *Journal of Nursing Scholarship*, *Journal of Emergency Nursing*, and *Nursing Standard* (coming in April 2016). Core nursing journal coverage is augmented with elite medical publications such as *The New England Journal of Medicine* and *The Lancet* and is easily linked to other required content. Compared to other providers, ProQuest has shorter embargoes and more full-text content.

Diverse content aligned with student, instructor, and researcher needs. Supports end user need for diverse content with thousands of full-text dissertations unique to ProQuest covering many areas including nursing, mental health, public health, and topics related to the delivery of patient care.

ProQuest amasses summary journals, conference proceedings, trade journals, books, and more into a single cross-searchable collection. These primary, secondary, and tertiary content sources cover the spectrum of nursing scholarship and give all users from undergraduates and faculty to clinicians and practitioners easy access to relevant content.

Best practice. Access to evidence-based resources is as important as ever, which is why ProQuest includes thousands of evidence-based articles (systematic reviews and meta-analysis) and clinical trial records, not to mention expert opinions and findings from cohort and experimental studies.

Clinical training videos to learn by doing. Video content is a great support tool for nursing students and instructors before entering a clinical environment. Prepping to administer patient medication or performing a geriatric assessment is a bit easier when healthcare providers have seen it done before. The Nursing & Allied Health Database includes over 1,200 video clips from MedCom covering important topics such as healthcare safety, emergency planning, checking vital signs, and many more. All MedCom video clips on the ProQuest platform are expertly indexed with summary abstracts so they are seen in relevant search results right away.

Discoverability. ProQuest collaborates with other information service providers to ensure that no matter where a researcher starts, connecting with ProQuest content is simple and seamless. In addition to The Summon® Service from ProQuest, ProQuest content is discoverable through OCLC WorldCat, Ex Libris Primo Central, PubMed, and Google Scholar. Plus, through the ebooks tab on the ProQuest search results page, researchers can cross-search their organization's ProQuest ebook holdings (if available) alongside their ProQuest platform database content.

Ease of use. Available on ProQuest, named as Best Interface in the 2015 *Charleston Advisor Reader's Choice Awards*: *"It is much more intuitive and easy to use than previous versions. It includes improved document viewing, easier navigation...Kudos to ProQuest."*

Psychology Database

Bridge theory and practice with leading psychology publications

THE PSYCHOLOGY DATABASE is ProQuest's highly accessible full-text resource for students, teachers, and researchers, as well as health and social care professionals. The Psychology Database combines high impact full text from leading psychology publications, with diverse sources of content including dissertations and training videos to help new students bridge theory with practice.

The database encompasses a wide range of topics from leading psychological and psychosomatic publications. In addition to clinical and social psychology, it also provides coverage of related disciplines including genetics, psychology of business and economics, communication, criminology, addiction, neurology, social welfare, and more. A number of the titles are heavily cited and have a strong set of ISI impact factors. Titles include *The American Journal of Psychiatry*, *Psychotherapy and Psychosomatics*, *The American Journal of Geriatric Psychiatry*, *Development and Psychopathology*, and *The Psychological Record*.

Subject areas include:

- Behavioral psychology
- Clinical psychology
- Developmental psychology
- Neurology
- Personality
- Psychobiology
- Psychometrics
- Social psychology

About the Psychology Database:

- Provides ongoing full-text access to hundreds of leading publications, many with high impact factors and indexed in PsycINFO®.
- Thousands of full-text dissertations are included, representing a range of psychology disciplines including behavioral, clinical, cognitive, developmental, experimental, industrial, personality, physiological, psychobiology, psychometrics, and social psychology.
- It also includes hundreds of curriculum aligned psychology videos clips presented by expert faculty from National Institute of Health.
- In addition to clinical and social psychology, it also provides coverage of related disciplines including criminology, addiction, neurology, social welfare, and more.
- Diverse content makes it easier for students and researchers alike to understand new subjects, access relevant literature, and monitor the latest thinking.
- Access is provided with fewer embargoes AND more peer-reviewed titles. It includes thousands of publications and full-text dissertations not available elsewhere in aggregated databases.

Available on ProQuest, awarded Best Interface in the 2015 *Charleston Advisor Readers' Choice Awards*.

To learn more or request a free trial, contact us at www.proquest.com/go/D8909.

Medical Database

Key full-text titles across core medical disciplines

USERS IN ACADEMIC libraries can find definitive research information in the Medical Database. This resource is built on abstracts and indexing from the well-known MEDLINE® database, plus over 1,400 publications in full text.

The collection's international coverage with content dating back to 1980 provides a strong, stable foundation for any library wishing to build and expand its clinical and biomedical journal collection with content that covers all major clinical and healthcare disciplines, including cardiovascular diseases, pediatrics, neurology, respiratory diseases, dentistry, anesthesiology, and others. The books, magazines, references/reports, scholarly journals, top journals, and trade publications that comprise the collection are provided by over 240 publishers including Massachusetts Medical Society, Elsevier, Springer, Nature Publishing, and Cambridge University Press. Key titles include *The Lancet*, *The New England Journal of Medicine*, and *Nature*, among others.

Researchers, faculty, students, and administrators at academic libraries will find the contents of the Medical Database useful to their studies. In addition, healthcare professionals such as physicians, nurses, dentists, and allied health practitioners will also find that this resource's diverse and ongoing full text coverage provides them with easy access to the latest research in their field. The Medical Database is able to meet the needs of such a wide audience because it offers:

- Ongoing, full text access to high-impact publications such as *The New England Journal of Medicine* and *The Lancet*.
- Easy access to full text from PubMed and Google Scholar, as well as ProQuest's own discovery services: The Summon® Service and Ex Libris Primo Central.
- Fewer embargoes, more peer-reviewed titles, and thousands of publications and full-text books not available elsewhere in aggregated databases.
- Easy to use interface, giving researchers the capability to search comprehensively with precision and speed from any device.

Subject areas include:

- Anesthesiology
- Cardiovascular diseases
- Communicable diseases
- Dentistry
- Dermatology
- Endocrinology
- Gerontology
- Immunology
- Neurology
- Obstetrics and gynecology
- Oncology
- Orthopedics
- Pediatrics
- Psychiatry
- Public health
- Radiology
- Respiratory diseases
- Surgery
- Traumatology
- Venereology

To learn more or request a free trial, contact us at www.proquest.com/go/D8909.

Public Health Database

The starting point for public health information for students, researchers and health professionals

THE PUBLIC HEALTH Database is the ideal starting point for public health information for students, teachers, researchers, and professionals. It delivers core public health literature from thousands of publications, much of it in full text. With journals, dissertations, videos, news, trade publications, reports, and more, the database covers a wide variety of disciplines ranging from social sciences to business to biological sciences. Journal results are indexed from core literature collected from a variety of publishers using appropriate public health terminology.

Users can also access current newspaper articles to uncover the latest breaking news pertaining to public health, such as flu pandemics, disaster preparedness, and obesity. In addition, thousands of full-text dissertations offer in-depth scholarly insights into important topics such as biostatistics, environmental health sciences, epidemiology, health services administration, international public health, maternal and child health, and occupational safety and health.

Subject areas include:

- Biostatistics
- Environmental health sciences
- Epidemiology
- Health services administration
- International public health
- Occupational safety and health

Why the Public Health Database?

- Helps students, researchers and health professionals alike to understand new subjects, access relevant literature, and monitor the latest thinking.
- Access is provided with fewer embargoes, more peer-reviewed titles, and thousands of publications and full-text dissertations not available elsewhere in aggregated databases.
- ProQuest's easy to use interface gives researchers the capability to search comprehensively with precision and speed.
- It pulls together information from the social sciences, business, and biological sciences from a variety of publishers and covers current public health news stories, offering timely articles on the latest breaking topics pertaining to public health, such as flu pandemics, disaster preparedness, and obesity.
- The database offers access to core public health journals. Users can access leading publications including *American Journal of Public Health*; *Epidemiology and Infection*; *Public Health Nutrition*; *Aids Education and Prevention*; and *New England Journal of Medicine* enhanced with specific public health terminology.

Available on ProQuest, awarded Best Interface in the 2015 *Charleston Advisor Readers' Choice Awards*.

To learn more or request a free trial, contact us at www.proquest.com/go/D8909.

Family Health Database

Professional, consumer and news titles

THE FAMILY HEALTH Database is a useful resource of consumer health related information covering topics such as alternative medicine, midwifery, mental health, wellness, and dentistry. It includes important general medical journals such as *The Lancet* and *The New England Journal of Medicine* as well as a strong selection of consumer and news magazines.

The Family Health Database offers international coverage dating back to 1988 of an enormous range of public health subjects, including pandemics, disaster preparedness, and obesity. The content in this database was selected with consumers and patients in mind. Therefore, public library patrons needing credible and timely healthcare information will find the Family Health Database very useful. Provided by over 190 publishers, over 350 full-text magazines, newspapers, scholarly journals, and trade publications and over 300 health video clips from INTELECOM are included in the collection. Key titles include *American Family Physician*, *Psychiatric Times*, *Psychology Today*, *Family Relations*, *Journal of Youth and Adolescence*, *Men's Health*, *Women's Health Weekly*, and *Pediatrics for Parents*.

Subject areas include:

- Dentistry
- Midwifery
- Sports injuries
- Eye care
- Nutrition
- Women's health

Why the Family Health Database?

- Provides the general researcher with fast and easy access to reliable medical information from trustworthy and recognizable medical publishers.
- Unlike other providers who select content for advanced users and professionals, the collection also supports learning and research.
- Covers an enormous range of subjects of value to public libraries and for consumers needing healthcare information – from sports injuries to women's health, from food and nutrition to midwifery, from eye care to dentistry.
- Provides over 500 publications, including essential general medical journals like *The New England Journal of Medicine* and popular health focused magazines such as *Men's Health*, *Prevention*.

Available on ProQuest, awarded Best Interface in the 2015 Charleston Advisor Readers' Choice Awards.

To learn more or request a free trial, contact us at www.proquest.com/go/D8909.

Health Management Database

Health administration, insurance, law, ethics, and more

THE HEALTH MANAGEMENT Database is designed for researchers studying the field of health administration, as well as professionals in the field. This high-demand healthcare management content provides the most reliable and relevant information on a wide range of topics, including hospitals, insurance, law, statistics, business management, personnel management, ethics, health economics, and public health administration.

It offers quality content, much of which is not available elsewhere, from over 260 publishers including Advanstar Communications, Inc., Australian Healthcare and Hospitals Association, Health Administration Press, HCPro, Inc., NewsRx and World Health Organization.

Access is provided with fewer embargoes, more peer-reviewed titles, and thousands of publications and full-text dissertations not available elsewhere in aggregated databases.

Content highlights include scholarly journals, top journals, and trade publications, such as *Health Care Strategic Management*, *Hospitals and Health Network*, *International Journal of Health Care, Finance and Economics*, *Journal of Health Organization and Management*, *Harvard Business Review*, and *The Journal of Healthcare Management*.

Diverse content makes it easier for students and researchers alike to understand new subjects, access relevant literature, and monitor the latest thinking. Content featured includes over 6,000 specialist doctoral dissertations and theses and over 1,100 reports from Business Monitor International related to the health care industry.

ProQuest's easy to use interface gives researchers the capability to search comprehensively with precision and speed.

Subject areas include:

- Business management
- Ethics
- Health economics
- Hospitals
- Insurance
- Law
- Personnel management
- Public health administration
- Statistics

To learn more or request a free trial, contact us at www.proquest.com/go/D8909.

Health & Medicine Ebook Subscription and Health & Medicine Ebook Perpetual Pack 2015

A foundational health and medicine ebook collection

CAREFULLY CURATED BY on-staff librarians, ProQuest's Health & Medicine Ebook Subscription offers access to a critical mass of more than 10,000 ebooks in all medical subjects, with exceptional strength in health services administration, internal medicine, nursing and allied health, and psychiatry and mental health. The subscription provides unlimited, multi-user access and no turnaways to many award-winning titles from such publishers as Wolters Kluwer Health, Elsevier Science, Thieme Medical Publishers, Spring Publishing, and Johns Hopkins University Press.

Adding the Health & Medicine Ebook Perpetual Pack 2015 to the Health & Medicine Ebook Subscription expands subject coverage with approximately 50 premium titles from Wolters Kluwer, Springer Publishing Company, F.A. Davis., and other leading publishers. This pack, specifically created to augment the subscription, features nine Doody's Core Titles and one *CHOICE* Outstanding Academic Title, including *Structured Approaches in Public Health* (Routledge, 2013), *The Lippincott Manual of Nursing Practice* (Wolters Kluwer, 2013), and *Epidemiology* (Elsevier, 2013).

This foundational content is offered on a platform that's intuitive to digital natives and simplifies the research process making it easier to discover, evaluate, and access new content. Researchers can find exactly what they are looking for with robust search capabilities, browse by subject functionality, and the ability to narrow search results by filters. Search results by book and chapter display the most relevant results and allow easy navigation to the full-text content. Time-saving tools for note-taking, highlighting, and citing keep researchers in context while reading and reduce disruptions to their work.

Researchers can read online or take advantage of offline reading options including DRM free chapter downloads, and full book downloads. Support for mobile devices is offered, with optimization of heavily used features such as download on tablets and smartphones. Librarians can easily access analytics to identify user trends, download usage reports to prove value to library management, and take advantage of the ability to upgrade to Academic Complete should additional subject coverage benefit researchers.

The Health & Medicine Ebook Subscription combined with the Health & Medicine Sciences Ebook Perpetual Pack 2015 helps everyone from future nurses to public health administrators to gain the insight they need to land high marks in the classroom and achieve success in the workplace.

Subjects include:

- Health services administration
- Internal medicine
- Nursing and allied health
- Psychiatry and mental health

Why the Health & Medicine Ebook Subscription and Health & Medicine Ebook Perpetual Pack 2015?

- The Health & Medicine Ebook Subscription is an affordable way to provide a critical mass of essential medical content on all topics relevant to those in the industry. The subscription is updated regularly with no additional cost during the subscription term.
- Pairing the subscription with the carefully curated Health & Medicine Ebook Perpetual Pack 2015 expands subject coverage with approximately 50 additional titles from publishers such as Wolters Kluwer, Springer Publishing Company, and F.A. Davis.
- Integration with The Summon® Service from ProQuest makes the subscription's award-winning titles from publishers such as Wolters Kluwer Health, Elsevier Science, Thieme Medical Publishers, Springer Publishing, and Johns Hopkins University Press more easily discoverable, leading to higher usage.

To learn more or request a free trial, contact us at www.proquest.com/go/D8909.

American Psychological Association (APA) Databases

Core databases, available on ProQuest

DATABASES FROM THE American Psychological Association (APA) allow researchers to access the full breadth of research in behavioral and social science. These resources are offered on the ProQuest platform, pairing their authoritative content with powerful discovery, linking, and retrieval tools that are useful in exposing related content, dynamically linking to full-text documents, and much more.

Each APA database is extremely powerful on its own, but in combination, they create an essential core of behavioral science literature with far-reaching interdisciplinary applications, establishing extraordinary value for any institutional collection.

- **PsycINFO®**
Explore the full breadth of research in the behavioral and social sciences with confidence through PsycINFO. Focused on the interdisciplinary aspects of the worldwide behavioral and social science research and literature, PsycINFO is unmatched as a resource for locating scholarly research findings in psychology and related fields across a host of academic disciplines from the historical to the cutting edge.
- **PsycARTICLES®**
Delve into the science of psychology and behavior with PsycARTICLES, the database of full-text, peer-reviewed articles published by APA and affiliated journals. With current journal coverage and historical content dating back more than a century, this esteemed collection provides access to the full spectrum of research in the field and is an indispensable resource for researchers, practitioners, students, and educators.
- **PsycEXTRA®**
Devoted to curating and indexing hard-to-find content from authoritative sources, PsycEXTRA allows researchers to go beyond traditional peer-reviewed research materials. Discover the latest conference proceedings, newsletters, reports, patient-oriented factsheets and brochures, magazines, monographs, standards and guidelines, and more.
- **PsycBOOKS®**
PsycBOOKS is an extensive collection of peer-reviewed books that provides students, researchers, and educators access to high-quality publications in psychology and related fields. PsycBOOKS includes the newest scholarly and professional books published by APA including reference works from the APA Handbooks in Psychology® series that delve deep into specific subfields within psychology.
- **PsycTESTS®**
Professionally indexed, the PsycTESTS database is an extensive collection of psychological measures, scales, surveys, and other instruments essential to the research needs of professionals, students, and educators across the behavioral and social sciences.
Focused on a collection of instrumentation tools developed for research but not made commercially available, PsycTESTS helps researchers easily find scales and measures for their own use.
- **PsycCRITIQUES®**
Offering a wealth of information for practitioners, faculty, students, and librarians alike, the PsycCRITIQUES® database extends beyond typical book reviews by covering relevant films and videos. With new reviews added each week, PsycCRITIQUES provides analysis and insights to help in collection development, research, classroom activities, and practice.

To learn more or request a free trial, contact us at www.proquest.com/go/D8909.

British Nursing Database, British Nursing Index

Supporting nurses, midwives and healthcare professionals in the U.K.

The British Nursing Index (BNI)

British Nursing Index is a leading database for support of practice, education, and research for nurses, midwives, and health providers in the U.K. or following U.K. practice. It provides references to literature in the most relevant nursing and midwifery journals. Also included are relevant nursing articles from selected medical, allied health, community and health management journals. Coverage is mainly titles published in the U.K., plus a selection of important international nursing titles.

The British Nursing Database

The British Nursing Database includes essential full-text coverage from U.K. and other English language nursing and midwifery publications. High impact international titles in these areas are also included. Bibliographic data from the British Nursing Index (BNI) underpins this product to improve the discovery of content. In addition to full-text coverage, the British Nursing Database provides abstracting and indexing for hundreds of titles dating back to 1993 from relevant medical, allied health, and management journals.

Subject areas include:

- Dermatology and venerology
- Dietetics
- Drug abuse and alcoholism
- Epidemiology
- Forensic sciences
- Genetics
- Geriatrics
- Gerontology
- Medical law
- Neurology
- Nursing
- Nutrition
- Obstetrics and gynecology
- Occupation and careers
- Oncology
- Pediatrics
- Psychiatry
- Psychology
- Public health and safety
- Social Service and welfare
- Special education and rehabilitation

Includes leading nursing and related publications:

- *Australian Journal of Advanced Nursing*
- *Australian Nursing Journal*
- *British Journal of Midwifery*
- *British Journal of Nursing*
- *British Medical Journal*
- *Canadian Nurse*
- *Evidence-Based Nursing*
- *Journal of Advanced Nursing*
- *Journal of Palliative Care*
- *Journal of the Royal Society of Medicine*
- *Nursing Standard*
- *Nursing Times*

To learn more or request a free trial, contact us at www.proquest.com/go/D8909.

Biological Science Database

Comprehensive sources, focused results

THE BIOLOGICAL SCIENCE Database provides comprehensive coverage of biological science fields including animal behavior, aquatic life and fisheries, chemoreception, biochemistry, ecology, plant science, toxicology, virology, microbiology, immunology genetics, health and safety science, oncogenes, entomology, and endocrinology neuroscience, and brings together ProQuest's award-winning search functionality and the ability to cross-search with subject-specialized abstract and citation databases.

Featuring content from 1982 to current, the Biological Science Database leverages high indexing standards to assist in retrieval of resources relevant to biological sciences. With over 2.9 million full-text articles from over 1,200 high impact factor scholarly journals, trade and industry publications, and news sources and over 40 million abstracts and citations across a wide range of research in biological sciences, it offers a very comprehensive literature review across the entire discipline beyond scholarly journals to discipline specific trade and industry titles. The database is international in scope and multilingual with abstracts in English, offering a high return on investment for libraries as researchers discover articles available within the library's paper and digital resources.

A tool to facilitate in-depth research and comprehensive literature reviews across the biological sciences and related disciplines, benefits of the Biological Science Database include:

- User interface gives researchers the capability to search comprehensively with precision and speed
- Comprehensive scope of coverage; journals, conference proceedings, dissertations, and more cannot be duplicated in a stand-alone aggregated database
- Built on a foundation of traditional and innovative abstracting and indexing (A&I) of all relevant literature.
- Immediate access to thousands of full text titles and key content sources identified through the search process.

The following sub-databases are included in the Biological Science Database:

- Algology Mycology & Protozoology Abstracts (Microbiology C)
- Animal Behavior Abstracts
- Aquatic Science & Fisheries Abstracts (ASFA) 1: Biological Sciences & Living Resources
- Aquatic Science & Fisheries Abstracts (ASFA) Aquaculture Abstracts
- Aquatic Science & Fisheries Abstracts (ASFA) Marine Biotechnology Abstracts
- Bacteriology Abstracts (Microbiology B)
- Biochemistry Abstracts 1
- Biochemistry Abstracts 3
- Biological Science Journals
- Biotechnology Research Abstracts
- Calcium & Calcified Tissue Abstracts

Discipline-Specific Resources

ComDisDome

ComDisDome is an indexing and abstracting tool covering the communications disorders literature with focus on speech-language pathology and audiology. In one convenient location, the database will quickly identify and connect users to reliable information from multiple sources in their field, including journal articles and books along with access to profiles of researchers working in this area.

ComDisDome will help users to stay current on the latest findings and trends in communications disorders research, improve patient communication and education, write research reports and grants, and locate and communicate with researchers in the field.

International Pharmaceutical Abstracts (IPA)

The International Pharmaceutical Abstracts (IPA) provide a comprehensive collection of information on drug use and development. As a primary source of drug-related health literature, IPA provides pharmacists, poison information specialists, drug information centers, the pharmaceutical industry, health practitioners, pharmacologists, medical librarians, cosmetic companies, environmentalists, educators, toxicologists, and litigators with information from over 800 health journals throughout the world.

Pharmaceutical News Index

As public scrutiny of the healthcare industry intensifies, Pharmaceutical News Index gives researchers access to the latest information on medical technology, research, and legislative developments. The database contains bibliographic information and indexing for 22 key U.S. and international pharmaceutical, healthcare, biotechnology, medical device, and cosmetic industry newsletters.

All publications in Pharmaceutical News Index are thoroughly indexed so users can perform quick, efficient searches.

Physical Education Index

The surge of academic, professional, and personal interest in the field of physical education has resulted in a huge volume of scholarly and trade literature. Since 1970, Physical Education Index has been covering this vast collection of material. Records are indexed and classified from peer-reviewed journals, report literature, conference proceedings, trade magazines, patents, articles from the popular press, and many other publications.

Physical Education Index allows all researchers and professionals in the field to acquire accurate and scholarly information in this comprehensive database. These abstracts feature a wide variety of content, ranging from physical education curricula to sports medicine to dance. Other coverage includes sport law, kinesiology, motor learning, recreation, standardized fitness tests, sports equipment, business and marketing, coaching and training, and sport sociology/psychology. Health education and physical therapy are also covered as they continue to become more prevalent in our society.

PILOTS: Published International Literature on Traumatic Stress

The PILOTS bibliographic database, covering the Published International Literature on Traumatic Stress, is produced at the headquarters of the National Center for Post-Traumatic Stress Disorder in White River Junction, Vermont. The PILOTS database is sponsored by the U.S. Department of Veterans Affairs. Its goal is to include citations to all literature on post-traumatic stress disorder (PTSD) and other mental-health sequelae of traumatic events, without disciplinary, linguistic, or geographical limitations, and to offer both current and retrospective coverage.

New RefWorks

Next-generation reference management software that helps researchers and librarians do more

NEW REFWORKS IS next-generation reference management software that provides new ways for librarians to support their researchers and enhance the value of the library in their communities.

- New RefWorks streamlines and simplifies both the research and the paper writing process. With this one tool, users have all they need to capture, store, organize, collaborate on and cite research material.
- New RefWorks empowers librarians to become an integral part of the research process. Librarians deliver dependable software, enable access to materials while preserving intellectual property, and help students and faculty complete effective research.

A RefWorks subscription provides access to both New RefWorks and the legacy version, providing access to trusted functionality and new features and updates that make the tool even more valuable.

Why New RefWorks?

For the researcher, New RefWorks enables better outcomes in less time, by making it easy to:

- Identify, capture, store, and access top content
- Review, comment, and collaborate on references
- Generate bibliographies and other citations for papers and grants

For the librarian, New RefWorks delivers advanced administrative controls. Librarians take charge of their subscription, with tools like:

- Customization of institutional styles
- Analytics to help librarians and administrators understand who is using it and how

New RefWorks delivers a reliable, time-saving service that researchers require – backed by ProQuest's world-class support. It's the easiest, most effective way to provide students and faculty with comprehensive research capabilities.

ProQuest® Dissertations & Theses Global

Official dissertations repository for the Library of Congress and critical scholarly content

THE LARGEST DATABASE of electronic theses and dissertations available worldwide, ProQuest Dissertations & Theses Global includes 4 million works from more than 3,000 universities all over the world. More than 120,000 works are added annually through an ever-expanding network of global university partners.

ProQuest Dissertations & Theses Global offers an extensive and expanding global collection of dissertations and theses, an important and valuable tool for the university and the researcher in all areas of scholarship. Institutions can transform the library's dissertations and theses, make institutional research globally discoverable from trusted databases, and provide on-demand use to authoritative information. Direct, immediate access to full-text graduate works saves time and money by reducing resources required to secure graduate works through inter-library loan.

For the researcher, deep coverage and extensive bibliographies uncover sources and ideas that would otherwise be missed. Fast and seamless access to nearly 2 million full-text works and cross-referenced access to scholarly content across the library's online service enhances the research experience.

Why ProQuest Dissertations & Theses?

Dissertations and theses are essential to scholarship throughout the university. Working with ProQuest, institutions can transform the library's dissertations and theses, make institutional research globally discoverable from trusted databases, and provide on-demand use to authoritative information.

- Dissertations are a crucial form of scholarly communication.
- Dissertations provide great sources for specific areas of research.
- Dissertations are scholarly works based on original research.
- Dissertations test and present new ideas and trends.
- Dissertations contain data and results of lab experiments, fieldwork, surveys, and statistics that are often the basis of journal articles—details journal articles often don't include.
- Dissertations provide valuable context for learning about faculty, institutions, and fellow scholars.

For the researcher, deep coverage and extensive bibliographies uncover sources and ideas that would otherwise be missed. Fast and seamless access to nearly 2 million full-text works and cross-referenced access to scholarly content across the library's online service enhances the research experience in a variety of ways:

- **Ideas:** uncover the research history of a topic and seek niches for further research.
- **Literature reviews:** PhD theses contain a full literature review of the research within the topic area.
- **Latest research:** Graduate works feature the latest trends and most up-to-date topic overviews.
- **Depth:** PhD theses are often more detailed than journal articles.
- **Unique content:** Many niche humanities and history theses, for example, may be the only literature on the topic.
- **Structure:** Find examples of abstracts, how to structure an argument, and how to document research.

Awards and Product Reviews

- Official dissertations repository for United States Library of Congress
- Database of record for graduate research, American Research Libraries
- More than 2 million full-text PDFs from 3,000 schools
- 120,000 new works added each year
